

# ARTIFICIAL INTELLIGENCE (PHASE 5)

## AIM(S)

1	In this course, it is aimed that students learn the basic concepts of artificial intelligence.
2	In this course, it is aimed that students learn artificial intelligence algorithms.
3	In this course, it is aimed that the students gain the knowledge and skills that will enable them to propose solutions to the problems in the field of health with artificial intelligence methods.

## LEARNING OBJECTIVE(S)

1	To be able to explain the basic concepts of artificial intelligence.
2	To be able to apply artificial intelligence algorithms.
3	To be able to propose solutions to the problems in the field of health with artificial intelligence methods.

## INTENDED LEARNING OUTCOME(S)

1	Can explain the basic concepts of artificial intelligence.
2	Can apply artificial intelligence algorithms.
3	Can propose solutions to the problems in the field of health with artificial intelligence methods.
