

MSKU FACULTY OF MEDICINE DEPARTMENT OF PHYSIOLOGY

STUDENT GUIDE FOR LABORATORY PRACTICES

1. PURPOSE AND SCOPE

This guide has been prepared to explain the rules that must be applied in order to work safely and harmoniously in the Physiology Laboratory of Muğla Sıtkı Koçman University (MSKU) Faculty of Medicine. This guide covers the working rules of MSKU Faculty of Medicine Physiology Laboratory.

2. RESPONSIBILITY

MSKU Faculty of Medicine, Department of Physiology is responsible for the preparation and revision of this guide, and the faculty, staff and students of MSKU Faculty of Medicine, Department of Physiology are responsible for its implementation.

3. INSTRUCTION DETAIL

Student Health and Safety

1. The rules stated below are applied to prevent injuries and damage caused by chemicals.
2. It is mandatory for every student to wear a lab uniform in the laboratory. Coat, shawl, etc. on the apron should not be worn. Thus, both your skin and your clothes will be protected from the possible effects of harmful substances.
3. Gloves, safety glasses and mask should be used during the experiments.
4. If the hair is long during the experiment, it must be collected, shoes must be suitable for working in the laboratory, closed shoes must be worn.
5. It is strictly forbidden to enter the laboratory with cold and hot drinks or food, such as water, tea, coffee, etc.
6. After the work is done, the table used should be left clean and tidy. The material used should be placed back in its place. Only the laboratory handbook, laboratory notebook and necessary laboratory materials should be brought to the work area. Personal materials such as bags, books, and coats that will not be used for the laboratory should be away from the work area.

7. No chemical substance in the laboratory should be touched, smelled or tasted by hand. No suction should be made from the pipette by mouth, vacuum or pump should be used for this process.
8. The hazards of the chemical to be used should be learned in advance, and the labels should be read before use to ensure that the correct chemical is used. It is necessary to have prior knowledge of safety equipment such as eye wash fountain, shower setup in the laboratory, fire extinguisher, emergency exit door.
9. If an electrical device is to be used during the work, first make sure that the hands and the relevant area are not wet.
10. Containers of chemical substances should be kept closed at all times. The preparation date, the name and surname of the preparer and the expiry date, if known, should be written on the newly prepared reagents.
11. If flammable and irritating substances come into contact with the skin, they should be washed with plenty of water without delay and the staff should be informed.
12. Chemical substances should never be taken out of the laboratory.
13. When going out of the laboratory, gloves and other waste materials used in the laboratory, etc. should be disposed of in a medical waste container.
14. Glass containers such as beakers, erlenmeyers and tubes containing liquid, which are finished, should be placed in the sink in consultation with the responsible lecturer, and should not be left on the table.
15. Organic solvents, volatile liquids should not be poured into the sink.
16. Replaced old scalpel tips and all cutting waste should be disposed of in the cutter waste bin. It should never be thrown into the household or biological waste bin.
17. Before leaving the laboratory, hands should be thoroughly washed with soap and water (even if gloves are worn).

Laboratory Layout

1. The laboratory course starts at the time specified in the course program.
2. It is not possible to leave the laboratory before the end of the laboratory lesson. In any extraordinary situation, the relevant instructor is informed.

3. Students must be in groups designated for them. Changing groups, entering with another group is prohibited.
4. If groups are allocated to tables, students must be at the tables designated for them. Changing tables is prohibited.
5. It is forbidden to take video and sound recordings by students in laboratories and to publish and distribute them on the internet and similar media, except with the permission of the Head of the Department. Violation of this rule may result in criminal penalties.
6. It is strictly forbidden to talk on the phone in the laboratory and to use electronic devices without permission.
7. It is forbidden to eat, drink (including water, chewing gum, etc.) and to have any food or beverage in the laboratory.
8. Nothing can be removed from the laboratory without permission.
9. Only the students of our faculty and other authorized personnel can enter the laboratory. It is strictly forbidden to bring visitors to the laboratory without permission from the Head of the Department.
10. It is forbidden to bring jackets, coats, bags, etc. and personal belongings to the laboratory.

Laboratory Exam Application Principles:

1. Students must be present at the exam venue half an hour before the start of the exam.
2. Exam papers are provided by the Department. Students must bring their own pencils and erasers to the exam.
3. Book, atlas, lecture notes, tablets, bags, jackets, smart bracelets, watches, glasses, etc. It is forbidden to bring personal items. These should be left in student lockers.
4. Before the exam, all students should turn off their mobile phones and leave them on the table at the entrance of the exam. Talking on the phone or texting is strictly prohibited.
5. Each student has to take the exam in their own group and order determined in the pre-announced lists. Group change will not be made, it should not be requested.

6. It is obligatory to write and sign the name, surname, student number on the exam papers. Students can only write on exam papers. They cannot write any text or leave lecture notes on the desk and table for the exam as a reminder, otherwise copying will be carried out.
7. During the exam, you will receive a buzzer or a similar warning every time you change a question. With this warning, the question changes and it is not possible to return to the previous questions.
8. At the end of the exam, the papers must be handed over to the staff in charge of the exam.
9. During the exam, it is forbidden for students to talk among themselves or with the staff unless necessary. In an extraordinary situation, raise your hand and wait for one of the staff members to come to you.
10. It is important to be quiet during the waiting period before and after the exam in order to conduct the exam in a healthy way.
11. In terms of exam security, before and after the exam, exam halls cannot be left, telephone or electronic devices cannot be used, and students who have not taken the exam cannot be talked to until the exam chairman gives permission.
12. Necessary actions will be taken within the scope of Higher Education Institutions Student Disciplinary Regulation and other relevant legislation for those who do not comply with the exam rules.

Necessary administrative/disciplinary action will be taken against students who do not comply with the rules and warnings mentioned above.
