

PHASE 5 GENERAL

LEARNING AIM(S)

1	In phase 5 courses, it is aimed that students learn to apply their basic knowledge within the scope of the National CEP.
2	In phase 5 courses, it is aimed that students reinforce the information obtained in the first three years by adapting them to the clinic, and learn current information, applied and theoretical knowledge about the art of medicine.
3	In phase 5 courses, it is aimed that students gain sufficient knowledge, skills, and attitudes about the functioning of academic activities and ethics.

LEARNING OBJECTIVE(S)

1	To be able to apply the knowledge and skills given in the first three semesters in the clinics within the phase 5 courses.
2	To be able to gain history taking and physical examination skills by actively participating in the examination and treatment of patients during the phase 5 courses.
3	To be able to have an idea about the functioning of academic activities by participating in activities such as seminars, case presentations, articles and translation hours conducted by the relevant departments during the phase 5 courses.
4	To be able to gain sufficient knowledge, skills, and attitudes about ethics.
5	To be able to develop in the subjects of interest with elective courses.

INTENDED LEARNING OUTCOME(S)

1	Can apply the knowledge and skills given in the first three semesters in the clinics within the phase 5 courses.
---	--
